Regulated child care spaces (state is number not rate)	2,000	NA	307,218	0.7%	29

Campbell County

At 78th, Campbell County ranks in the bottom fifth of Tennessee counties in child well-being. Some of the county's strongest rankings are for its low housing costs and its low rate of children without health insurance. The county's biggest challenges are that almost a third of its children live in poverty, and the county has a low rate of proficiency among 3rd to 8th grade children on TNReady reading tests.

An additional strength is an above average high school graduation rate.

Additional opportunities for improvement include an above average rate of pregnancy among girls age 15 to 17 and low rates of proficiency among 3rd to 8th grade children on TNReady math tests.

Policy/Practice/Program Options to Improve Outcomes. Many of these policies have multiple models for delivery, including public-private partnership and non-profit leadership.

- With a high rate of child poverty and a relatively low median household income, improving outreach to those who may qualify to receive SNAP, WIC and TennCare benefits to be sure they are aware of these services can help ensure basic needs are met. Additionally, nutrition programs that provide food for school-age children to take home can contribute to food security. Expanding services through Family Resource Centers can also help reach these vulnerable populations.
- Increased access to pre-K can help both math and reading proficiency in later grades. Early assessment of reading skills coupled with appropriate interventions where needed can improve reading proficiency, while increasing STEM opportunities in elementary and middle schools can help improve 3rd to 8th grade math proficiency.
- Comprehensive sex education classes that include both encouragement of abstinence and information on birth control have been shown to reduce the number of teen pregnancies.
